

# What our school does for social inclusion

---

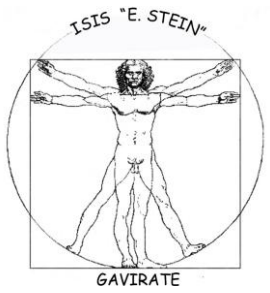

# Study method and motivation

- Improve academic results
- Increase motivation, develop self evaluation skills, work on controlling one's attention span, strengthen one's concentration, make students autonomus in regards of taking notes in class and organizing time at home

- Studying methods: professors will follow small groups of students by doing several activities in order to impose and consolidate studying methods
- Mentoring activities: students of classe IV will be there for their fellow second year classmates in regards of their studies

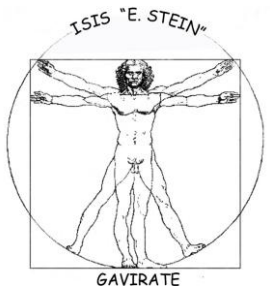

# Education to the study method

The school offers to the students of the first classes some hours of study method.

- presentation of the primary ways to make the attention effective and to start the training part of one's knowledge (take notes, make a concept map and exercise your memory).
- a test is given to the students to understand which is the learning style of each one is and then a psychology teacher will think about cognitive styles. you have the possibility to choose the most suitable tools and strategies for a profitable job.
- the possibility of studying with a teacher who plays the role of guide (assisted study).
- the school is open two afternoons a week (study assisted by volunteer students of the fourth classes and this education is called peer education).

# Theatre laboratory

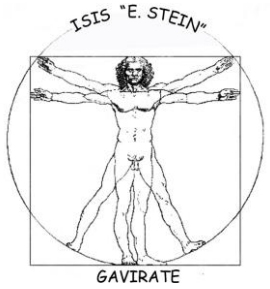

- Promote feeling of belonging by a creative language
- Strengthen and increase the self-awareness by theatre technique that increase social and interpersonal skills
- Gain more self-confidence
- Socialisation by personal and group activities

Increase and strengthen vocal and acting abilities, body language, listening to music and reading a book.

The activity ends with a final performance.

# Cyberbullying and digital education

## Objectives:

help to know cyberbullying in order to prevent it and intervene  
try to build a good climate in class with your classmates  
learn and deepen the Italian laws on cyberbullying.

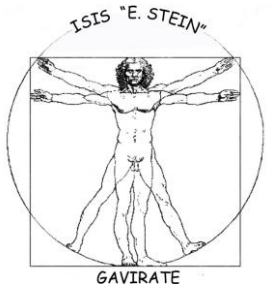

## Actions:

meetings with students about the use of smartphones, rules of coexistence and bullying

These meetings will help the learner to be more aware of bullying and more responsible.
